CARACAS 2.0

TOOLS REQUIRED

PACKAGE CONTENT (product shipped in 2 packages)

MOUNTING

1° PASSAGE

1. Check that the shower tray is level.
2. Place the profiles on the wall and use the plumb level.
3. Trace the holes in the wall with a pencil.
4. Drill holes in the wall.
5. Insert the wall plug and screw in the screws to secure the profiles.

IMPORTANT

It is good practice not to mount the profiles close to the outer edge of the shower tray, always leave about 1 cm for an optimum aesthetic and functional result.

2° PASSAGE

1. Apply silicone in the groove of the angle profile.
2. Insert the fixed glass inside the corner profile.
3. Insert the magnet profile inside the corner profile.

3° PASSAGE

1. Install the fixed wall to the previously fixed wall profile.

PLEASE NOTE: *nothing goes under the fixed slab, it must be placed and siliconed from the outside.*

4° PASSAGE

1. Place the 6 mm glass on the door side inside the previously mounted wall profile.

5° PASSAGE

1. Position the hinges on the 6 mm glass on the door side and fasten them to the glass as shown.
2. Insert the drip seal under the glass.

6° PASSAGE

1. Position the 6 mm glass on the door closing side.
2. Complete the fastening of the hinges to the glass as shown.

7° PASSAGE

1. Position the drip seal by shaping it, as shown in the figure, to allow the door to close properly and to seal against water.
2. Install the magnetic closing gasket on the glass.

8° PASSAGE

1. Check the plumbness of the book door, then drill holes and attach the 6x16 screws for locking with the wall profile.
2. Drill holes and attach the 6x16 screws from the inside of the corner profile, door-closing side, to secure it to the magnet profile and cover the screws with the appropriate plugs.
3. Check the plumbness, drill holes from the inside to secure the wall fixed to the wall profile with 8x16 screws and cover with the aluminium cover, so as to hide the fixing screws and to protect them from water.

Note: A total of 6 holes must be drilled, two per profile, 1 at the top and 1 at the bottom.

9° PASSAGE

1. Apply the extendable drip seal between the two panes.
2. Siliconise and position the lower sealing bar.
3. Siliconise and position the left and right fixing brackets.

Note: The sealing profile can be installed with 6*16 screws if it is flush with the floor.

CAUTION

The correct positioning of the lower holding bar and the left and right fixing brackets is as shown in figure 4.

10° PASSAGE

1. Position the slanted retaining bar bracket on the wall and mark the holes in the wall with a pencil.
2. Drill the holes in the wall with the drill, insert the wall plug and screw in the screws to secure the bracket.
3. Position the sealing bar.

11° PASSAGE

1. Install the handle (hole on the inside).
2. Install the cover caps at the top of the aluminium profiles.
3. Siliconise the outside of the shower enclosure around the entire perimeter as shown in the picture and wait 24 hours.
